OBJECTIVE

Seeking to leverage my technical expertise in software engineering and AI to develop innovative solutions, solve complex problems, and deliver exceptional value to customers in a collaborative and challenging environment

EXPERIENCE

January 2025 -
September 2025

- **Full stack developer**
SUNFLOWER SOFTLOANS
 - * **Frontend (Client & Admin):** Developed responsive, user-friendly interfaces using React and state management (Redux). Built features for loan applications, dashboards, admin tools, and data visualization (Chart.js).
 - * **Backend (Core Services):** Designed and secured RESTful APIs to handle all business logic, including user authentication, loan calculations, application workflows, and complex loan servicing.
 - * **Data Management:** Stored, managed, and retrieved all application and user data efficiently using Supabase, ensuring data integrity and supporting complex queries for reporting.
 - * **Admin & Security:** Created a secure internal portal for managing the loan lifecycle, including application review, loan management, and a comprehensive audit logging system for compliance.

February 2024 -
November 2024

- **Frontend developer - Ecommerce**
ADLA INITIATIVES INC
 - *Worked as a frontend developer for Adla initiatives
 - * Wrote clean, efficient HTML, CSS, Javascript and React code for the Adla initiatives Ecommerce website.
 - *Integrated APIs(fetching data from backend services)
 - * Developed UX/UI design for the adla initiatives ecommerce
 - *- Ensured seamless data flow (e.g., user authentication, product listings, cart updates etc).
 - *Worked with backend developers to integrate APIs and Databases.

EDUCATION

2021-2025

- **University Of Zambia**
Degree in Software Engineering

2023-2025

- **University of Zambia**
Certificate in Data Science (Data Analysis with python)

2024-2025

- **University of Zambia**
Certificate in Digital Marketing

SKILLS

- Python(with its libraries pandas, numpy, scikit learn and tensorflow)
- Javascript
- Typescript
- React
- Express JS
